

LAPTOP REQUEST CATALOG ITEM

Problem Statement:

Employees in the organization need a quick and efficient way to request laptops for work. The current process is manual and prone to delays, with no dynamic form behavior to guide users or ensure accurate data collection. To address this, a Service Catalog item needs to be created, allowing users to easily request a laptop, with dynamic fields, clear instructions, and additional functionality like resetting the form if needed. The solution should also ensure all changes are tracked for governance and deployment.

Objective:

Create a service catalog item for requesting a laptop. Use UI Policies to control form behavior, UI Actions for additional functionality, Update Sets to capture changes, and follow Service Catalog best practices.

Skills: Update set, Service catalog, UI policy, UI action

TASK INITIATION

Milestone 1 : Update sets

Activity 1: Create Local Update set

1. Open service now.
2. Click on All >> search for update sets
3. Select local update sets under system update sets
4. Click on new
5. Fill the following details to create a update set as: "Laptop Request"
6. Click on submit and make current
7. By clicking on the button it activates the update set .

NOTE: Perform all actions under this newly created update set only.

Milestone 2 : Service Catalog Item

Activity 1: Create Service Catalog Item

1. Open service now.
2. Click on All >> service catalog
3. Select maintain items under catalog definitions
4. Click on New.

Activate Deactivate

1 to 20 of 229

- Fill the following details to create a new catalog item
 Name: Laptop Request
 Catalog: service Catalog
 Category: Hardware
 Short Description: Use this item to request a new laptop
- Click on 'SAVE'

The screenshot shows the ServiceNow 'Catalog Item - Laptop Request' form. The form is titled 'Catalog Item - Laptop Request' and includes a search bar with 'maintain i'. The left sidebar shows the navigation menu with 'Service Catalog' and 'Catalog Definitions' expanded, and 'Maintain Items' selected. The main form area contains the following fields:

- Name:** Laptop Request
- Application:** Global
- Active:** ☒
- Fulfillment automation level:** Unspecified
- State:** --None--
- Checked out:** --None--
- Owner:** System Administrator
- Short description:** Use this item to request a new laptop
- Description:** (Rich text editor with a toolbar)

Activity 2: Add variables

Step1:

- After saving the catalog item form scroll down and click on variable(related list)
- Click on new and enter the details as below
 1. Variable 1:Laptop Model
 - Type: Single line text
 - Name: laptop_model
 - Order:100
- Click on submit
- Again click on new and add Remaining variables in the above process

ServiceNow Variable - New Record form. The form is for a 'Variable' and shows fields for Application (Global), Type (Single Line Text), Catalog Item (Laptop Request), and Order (100). The 'Question' tab is active, showing a table with columns for Question, Name, and Example Text. The first row has 'Laptop Model' in the Question column and 'laptop_model' in the Name column. The 'Submit' and 'Save' buttons are at the bottom.

2. Variable 2:Justification

Type: Multi line text

Name: justification

Order:200

3. Variable 3:Additional Accessories

Type: Checkbox

Name: additional_accessories

Order:300

4. Variable 4: Accessories Details

Type: Multi line text

Name:accessories_details

Order:400

Step2:

- After adding above variable which are added to newly created catalog item
- Then save the catalog item form

Milestone 3 : UI Policy

Activity 1: Create Catalog Ui policies

1. Click on all>> search for service catalog
2. Select maintain item under catalog definition
3. Search for 'laptop request' which is created before
4. Select 'laptop request' and scroll down click on "Catalog Ui policies"
5. In the catalog ui policies related list tab click on new
6. Give short description as: show accessories details
7. Set the Catalog Condition in the related list tab 'when to apply'
[field: additional_accessories, operator: is, value: true]
8. Click on **save**.(do not click on submit)
9. Scroll down and select 'catalog ui action'
10. Then click on new button
11. Select variable name as: accessories_details
Order:100
Mandatory: True
Visible : True
12. Click on save and again click save button of the catalog ui policy form

servicenow All Favorites History Workspaces Admin Catalog UI Policy Action - accessories_details

UI policy actions specify exactly what actions to take on a specified field. The conditions specified in the UI policy determine when these actions are triggered. [More Info](#)

Catalog Item: Laptop Request

Variable name: **accessories_details**

Order: 100

Application: Global

Mandatory: True

Visible: True

Catalog UI Policy Actions

Name	Read only	Mandatory	Visible	Order
accessories_details	Leave alone	True	True	100

1 to 1 of 1

Milestone 4 : UI Action

Activity 1: Create ui action

1. Open service now.
2. Click on All >> search for ui action
3. Select ui actions under system definition
4. Click on new
5. Fill the following details to create ui action

Table: shopping cart(sc_cart)

Order:100

Action name: Reset form

Client : checked

Script:

```
function resetForm() {  
  g_form.clearForm(); // Clears all fields in the form  
  alert("The form has been reset.");  
}
```

6. Click on save

The screenshot shows the ServiceNow 'UI Action - Reset Form' configuration page. The left sidebar contains a navigation menu with 'UI Action' selected. The main content area is divided into two columns. The left column contains fields for 'Name' (Reset Form), 'Table' (Shopping Cart [sc_cart]), 'Order' (100), and 'Action name' (Reset Form), all of which are highlighted with a red box. Below these are checkboxes for 'Active', 'Show insert', 'Show update', 'Client' (checked and highlighted with a red box), 'List v2 Compatible', and 'List v3 Compatible'. The right column contains a 'Save' button (highlighted with a red box) and various options for form and list styles, including 'Form button', 'Form context menu', 'Form link', 'Form style' (set to 'None'), 'List banner button', 'List bottom button', 'List context menu', 'List choice', 'List link', and 'List style' (set to 'None'). At the bottom, there are sections for 'Messages', 'Comments', 'Hint', 'OnClick', and 'Condition'.

Milestone 5 : Export Update set

Activity 1: Exporting changes to another instances

1. Click on All >> search for update sets
2. Select local update set
3. Select created update set i.e. 'Laptop Request Project'
4. Set the state to 'Complete'
5. In the related list Update tab, updates are visible which we perform under this update set.
6. Click on export to XML ,it download one file

The screenshot shows the ServiceNow interface for an update set named 'Laptop Request Project'. The 'State' is set to 'Complete'. The 'Related Links' section includes 'Export to XML', which is highlighted. Below this, a table lists updates for the 'Laptop Request Project'.

Conclusion :

The Laptop Request Catalog Item project successfully streamlines the process of requesting laptops within the organization by leveraging ServiceNow's Service Catalog capabilities. Through the implementation of a dynamic catalog item, the project ensures that users have an intuitive and user-friendly interface, reducing errors and improving efficiency. This project demonstrates how ServiceNow can be used to replace manual, error-prone processes with automated, efficient, and user-centric solutions. It not only improves service delivery but also enhances employee satisfaction by providing a modern and streamlined request experience.
